

ULTIMATE
SURFACE PERFORMANCE
ON METAL PARTS

WITH

DUPLEX SURFACE
TREATMENTS

USING

HEAT AND REACTIVE
DIFFUSION TECHNOLOGIES

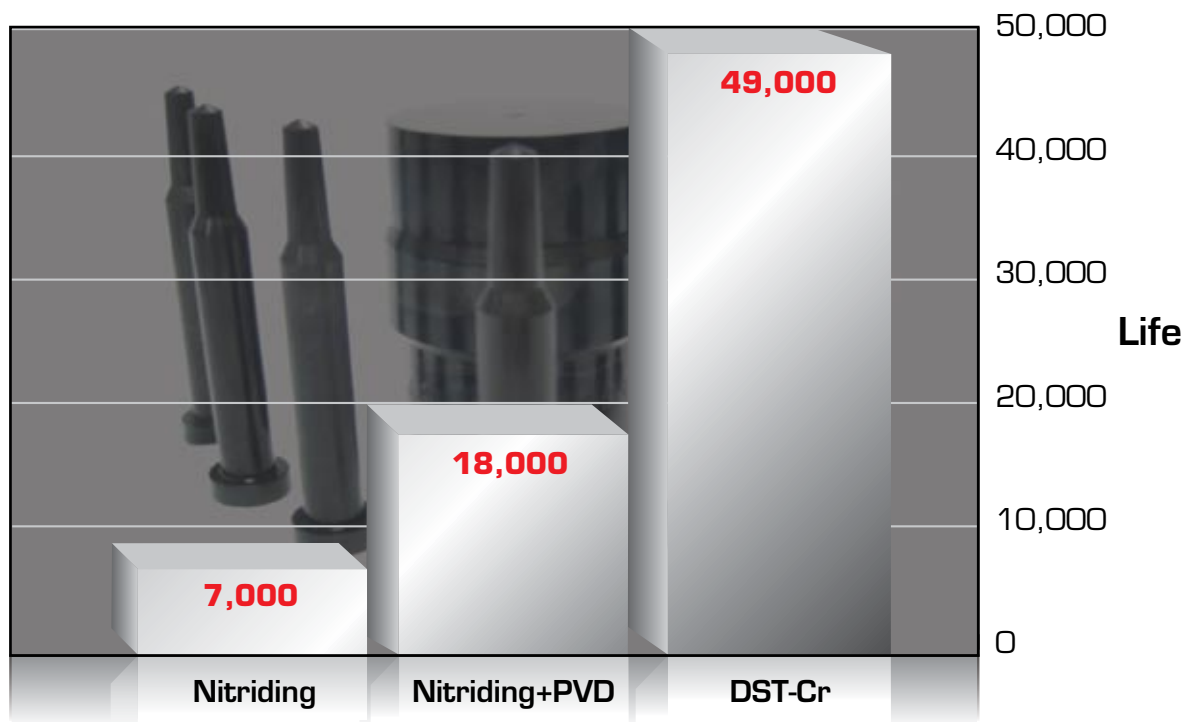

For a CD on this revolutionary process please contact us.

DUPLEX SURFACE TREATMENT ON METAL PARTS

DST at low temperature is a non-porous metallurgical bond that is superior to coatings and offers a superior alternative to:

- PVD - CD
- TD
- BORIDING
- NITRIDING
- NITROCARBURISING
- HARD CHROME

in the automotive, aerospace and metal working industries for improved performance.
